Broad use
Suitable for
medical and
cosmetic
procedures

02

Long-lasting
Maintains
anesthesia 1–2
hours after
removal

03

Safe profile
Well tolerated
with mild,
temporary
reactions

HOW TO USE

1. Apply a thick layer to clean, intact skin.
 2. Cover with an occlusive dressing (airtight patch/film) for 1-2 hours.
- * For IV insertion / venipuncture: apply ≥ 1 hour before.
 - * For skin graft / deeper procedures: apply ≥ 2 hours before.
 - * On genital mucosa: apply 5–10 minutes before procedure.
 - * Remove cream and clean the area before treatment.
